## UDL

→ Sometimes students get stuck

→ feedback for teacher

→ monitor body language

→ formative assessment

→ sometimes the material is inaccessible

→ existence (problem exists)

→ localization (where's the problem)

→ you need the following:

→ PCK → asking the right questions, etc

→ Content Knowledge - expertise

Pedagogical  
Content  
Knowledge

→ teaching tools

to help clarify

content for students

Formative assessment

reveals

students are stuck!

apply

PCK + content knowledge

doesn't exist in the WebQuest

need to be proactive and

pre-identify locations where

students might get stuck

## Examples of content delivery

→ batch of motivated students read a textbook chapter

→ cons (what pitfalls will affect students)

→ reading disability

→ learning style mismatch

→ approach to reading

→ critical reading

→ strategic reading

→ lack of "chunkiness"

→ lack of "chunking"

→ lectures

→ note taking

→ post lecture slides, etc to fix

→ maintain focus

Examples for assessment:

they confound the learning goal w/ means of expression
